Biometric Systems: Technology, Design and Performance Evaluation From Brand: Springer

Biometric Systems provides practitioners with an overview of the principles and methods needed to build reliable biometric systems. It covers three main topics: key biometric technologies, design and management issues, and the performance evaluation of biometric systems for personal verification/identification. The four most widely used technologies are focused on - speech, fingerprint, iris and face recognition.

Key features include: in-depth coverage of the technical and practical obstacles which are often neglected by application developers and system integrators and which result in shortfalls between expected and actual performance; and protocols and benchmarks which will allow developers to compare performance and track system improvements.

Editorial Review

About the Author

Dr. James Wayman and Prof. Anil Jain are two of the leading experts in the field. Dr. James Wayman is the Director of the US National Biometric Test Center.

Users Review

From reader reviews:

Adelina Thompson:

Have you spare time for a day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity to get spend your time. Any person spent their spare time to take a wander, shopping, or went to typically the Mall. How about open or maybe read a book called Biometric Systems: Technology, Design and Performance Evaluation? Maybe it is to be best activity for you. You know beside you can spend your time along with your favorite's book, you can better than before. Do you agree with its opinion or you have different opinion?

Shawn Martinez:

Book will be written, printed, or created for everything. You can learn everything you want by a book. Book has a different type. To be sure that book is important factor to bring us around the world. Next to that you can your reading expertise was fluently. A guide Biometric Systems: Technology, Design and Performance Evaluation will make you to always be smarter. You can feel a lot more confidence if you can know about anything. But some of you think in which open or reading a book make you bored. It isn't make you fun. Why they are often thought like that? Have you searching for best book or suited book with you?

Lisa Walker:

As people who live in the actual modest era should be up-date about what going on or details even knowledge to make them keep up with the era that is certainly always change and make progress. Some of you maybe will certainly update themselves by studying books. It is a good choice for yourself but the problems coming to you is you don't know what one you should start with. This Biometric Systems: Technology, Design and Performance Evaluation is our recommendation so you keep up with the world. Why, as this book serves what you want and wish in this era.

Jennifer Lewis:

With this era which is the greater person or who has ability in doing something more are more precious than other. Do you want to become one among it? It is just simple strategy to have that. What you need to do is

just spending your time not very much but quite enough to experience a look at some books. One of many books in the top list in your reading list is definitely Biometric Systems: Technology, Design and Performance Evaluation. This book that is certainly qualified as The Hungry Inclines can get you closer in growing to be precious person. By looking up and review this guide you can get many advantages.
