**Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics)** By Felix Klein, Mathematics

"Makes the reader feel the inspiration that comes from listening to a great mathematician." — *Bulletin*, American Mathematical Society

A distinguished mathematician and educator enlivens abstract discussions of arithmetic, algebra, and analysis by means of graphical and geometrically perceptive methods. His three-part treatment begins with topics associated with arithmetic, including calculating with natural numbers, the first extension of the notion of number, special properties of integers, and complex numbers. Algebra-related subjects constitute the second part, which examines real equations with real unknowns and equations in the field of complex quantities. The final part explores elements of analysis, with discussions of logarithmic and exponential functions, the goniometric functions, and infinitesimal calculus. 1932 edition. 125 figures.

## **Editorial Review**

### **Users Review**

#### **From reader reviews:**

##### **Alberta Sanchez:**

What do you ponder on book? It is just for students since they're still students or the idea for all people in the world, the particular best subject for that? Simply you can be answered for that concern above. Every person has several personality and hobby for every single other. Don't to be pressured someone or something that they don't need do that. You must know how great and important the book Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics). All type of book is it possible to see on many resources. You can look for the internet options or other social media.

##### **John Lee:**

Reading can called thoughts hangout, why? Because when you find yourself reading a book especially book entitled Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics) your thoughts will drift away trough every dimension, wandering in each aspect that maybe mysterious for but surely will become your mind friends. Imaging each word written in a reserve then become one web form conclusion and explanation that will maybe you never get ahead of. The Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics) giving you yet another experience more than blown away your thoughts but also giving you useful information for your better life with this era. So now let us show you the relaxing pattern is your body and mind will be pleased when you are finished looking at it, like winning a casino game. Do you want to try this extraordinary wasting spare time activity?

##### **Jessica Rodriguez:**

Do you have something that that suits you such as book? The e-book lovers usually prefer to choose book like comic, small story and the biggest the first is novel. Now, why not hoping Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics) that give your pleasure preference will be satisfied simply by reading this book. Reading behavior all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be claimed constantly that reading habit only for the geeky man or woman but for all of you who wants to always be success person. So , for every you who want to start studying as your good habit, you can pick Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics) become your current starter.

**Adam Perlman:**

Don't be worry if you are afraid that this book will filled the space in your house, you could have it in e-book means, more simple and reachable. This kind of Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics) can give you a lot of good friends because by you looking at this one book you have point that they don't and make you more like an interesting person. This book can be one of a step for you to get success. This book offer you information that probably your friend doesn't recognize, by knowing more than other make you to be great men and women. So , why hesitate? We need to have Elementary Mathematics from an Advanced Standpoint: Arithmetic, Algebra, Analysis (Dover Books on Mathematics).
