Reconstructing Quaternary Environments By J. John Lowe, Michael J.C Walker

This third edition of *Reconstructing Quaternary Environments* has been completely revised and updated to provide a new account of the history and scale of environmental changes during the Quaternary. The evidence is extremely diverse ranging from landforms and sediments to fossil assemblages and geochemical data, and includes new data from terrestrial, marine and ice-core records. Dating methods are described and evaluated, while the principles and practices of Quaternary stratigraphy are also discussed. The volume concludes with a new chapter which considers some of the key questions about the nature, causes and consequences of global climatic and environmental change over a range of temporal scales. This synthesis builds on the methods and approaches described earlier in the book to show how a number of exciting ideas that have emerged over the last two decades are providing new insights into the operation of the global earth-ocean-atmosphere system, and are now central to many areas of contemporary Quaternary research.

This comprehensive and dynamic textbook is richly illustrated throughout with full-colour figures and photographs. The book will be of interest to undergraduates, postgraduates and professionals in Earth Science, Environmental Science, Physical Geography, Geology, Botany, Zoology, Ecology, Archaeology and Anthropology

Editorial Review

Review

"This is a splendid compendium of what we know and understand about Quaternary environments, and how we study them. Lowe and Walker are to be congratulated on this fully updated version of their popular textbook. *Reconstructing Quaternary Environments* continues to be a must for Quaternary sciences courses at all university levels and an indispensable reference source for professional geoscientists. This new edition is beautifully illustrated and provides diverse examples from around the world; it is a real *tour de force* of Quaternary studies."

Professor Lewis Owen, Department of Geology, University of Cincinnati, USA

"The literature in Quaternary environmental and climatic change has increased exponentially during the last decades and now covers a wide range of archives, proxies and modelling studies. In this revised and updated 3rd edition, Lowe and Walker have successfully integrated the wealth of new data from around the world. The up-to-date information and references, the elegant language, the explanatory notes after each chapter and full-colour illustrations and photos all serve to make this wonderful textbook a treasure trove for students, researchers and anyone else interested in finding out more about the exciting subject of Quaternary climate and environmental change."

Professor Barbara Wohlfarth, Department of Geological Sciences, Stockholm University, Sweden

"The third edition of *Reconstructing Quaternary Environments* by John Lowe and Mike Walker continues the impressive standards set by its two predecessor volumes. Well written, extensively referenced and with numerous clear diagrams and colour figures, it sets the standard for textbooks on Quaternary science and the techniques to reconstruct environmental change. It should be essential reading for students and will be an invaluable reference for all those with an interest in the Quaternary."

Professor Colm O'Cofaigh, Department of Geography, Durham University, UK

"A good reference for courses (if complemented by a work with better focus on the human record) and a general introduction to this topic. Summing Up: Recommended. Upper-division undergraduates, graduate students, researchers/faculty."

CHOICE, E. Delson, CUNY Herbert H. Lehman College

About the Author

John Lowe is former Gordon Manley Professor of Geography and Quaternary Science, and now Emeritus Professor of Quaternary Science, Royal Holloway University of London.

Mike Walker is Emeritus Professor of Quaternary Science, School of Archaeology, History and Anthropology at Trinity Saint David, University of Wales, Lampeter, and Honorary Professor, Aberystwyth University.

Users Review

From reader reviews:

Cornell Neal:

As people who live in the modest era should be update about what going on or information even knowledge to make them keep up with the era that is certainly always change and move forward. Some of you maybe will probably update themselves by reading books. It is a good choice for you but the problems coming to an individual is you don't know what one you should start with. This Reconstructing Quaternary Environments is our recommendation to make you keep up with the world. Why, since this book serves what you want and wish in this era.

Carolyn Fletcher:

The book with title Reconstructing Quaternary Environments contains a lot of information that you can find out it. You can get a lot of gain after read this book. This particular book exist new knowledge the information that exist in this guide represented the condition of the world today. That is important to you to be aware of how the improvement of the world. That book will bring you with new era of the global growth. You can read the e-book on your smart phone, so you can read that anywhere you want.

Craig Chivers:

Does one one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you never know the inside because don't evaluate book by its deal with may doesn't work the following is difficult job because you are frightened that the inside maybe not as fantastic as in the outside appearance likes. Maybe you answer may be Reconstructing Quaternary Environments why because the fantastic cover that make you consider regarding the content will not disappoint you. The inside or content is usually fantastic as the outside or perhaps cover. Your reading 6th sense will directly assist you to pick up this book.

Nicholas Williams:

This Reconstructing Quaternary Environments is great e-book for you because the content that is full of information for you who also always deal with world and also have to make decision every minute. This particular book reveal it details accurately using great arrange word or we can declare no rambling sentences within it. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only gives you straight forward sentences but tough core information with attractive delivering sentences. Having Reconstructing Quaternary Environments in your hand like keeping the world in your arm, information in it is not ridiculous one particular. We can say that no publication that offer you world within ten or fifteen tiny right but this e-book already do that. So , it is good reading book. Heya Mr. and Mrs. stressful do you still

doubt that?
