Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) From Psychology Press

The work of Richard M. Shiffrin has highly impacted the field of cognitive science, and current developments within perception and memory have been influenced by his ideas. In this volume, several key figures in the field will comment on these developments and put them in a wider perspective. Although many theories and models have been presented in recent years for various aspects of human cognition, there have not been many comparative evaluations that focus on how these models have really advanced our understanding of the underlying mechanisms. This volume will be a valuable source of information for both cognitive scientists working in the field, and researchers and students looking for a clear, accessible presentation of the key problems in cognitive science. Highlighted sections include attention and perception, memory functions and processes, knowledge representation and semantics, modelling approaches and applications.

Users Review

From reader reviews:

Christina Evert:

Reading a book to be new life style in this calendar year; every people loves to go through a book. When you learn a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information on it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your analysis, you can read education books, but if you act like you want to entertain yourself look for a fiction books, these us novel, comics, and also soon. The Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) will give you new experience in studying a book.

Gladys James:

You could spend your free time to study this book this e-book. This Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) is simple to develop you can read it in the park, in the beach, train in addition to soon. If you did not have much space to bring the particular printed book, you can buy typically the e-book. It is make you easier to read it. You can save the actual book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.

Edgar Curtis:

As a pupil exactly feel bored for you to reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just minor students that has reading's internal or real their interest. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) can make you sense more interested to read.

Loren Hatmaker:

Some people said that they feel bored when they reading a publication. They are directly felt the item when they get a half regions of the book. You can choose the particular book Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) to make your personal reading is interesting. Your skill of reading ability is developing when you such as reading. Try to choose very simple book to make you enjoy you just read it and mingle the opinion about book and examining especially. It is to be first opinion for you to like to open up a book and study it. Beside that the e-book Cognitive Modeling in Perception and Memory: A Festschrift for Richard M. Shiffrin (Psychology Press Festschrift Series) can to be your new friend when you're truly feel alone and confuse with what must you're doing of the time.
