Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics)

From Brand: Springer

The contributions gathered in this volume provide introductions to current problems in geospace electromagnetic radiation, guides to the associated literature and tutorial reviews of the relevant space physics. Students and scientists working on various aspects of the terrestrial aurora or magnetospheric and near-Earth heliospheric high-frequency waves will find this volume an indispensable companion for their studies.

Editorial Review

Review

From the reviews of the first edition:

"The thirteen invited presentations which comprise this volume arose from a Workshop ... on 'High frequency waves in geospace'. The papers in this volume, written by well known and active research scientists, will be a most useful resource for postgraduate students and researchers alike. This is because this book constitutes an up-to-date source of material that is published in a wide array of journals. ... I recommend it highly to readers who are interested in the topic." (M. J. Rycroft, *Surveys in Geophysics*, Vol. 27, 2006)

From the Back Cover

The contributions gathered in this volume provide introductions to current problems in geospace electromagnetic radiation, guides to the associated literature and tutorial reviews of the relevant space physics.

Students and scientists working on various aspects of the terrestrial aurora or magnetospheric and near-Earth heliospheric high-frequency waves will find this volume an indispensable companion for their studies.

Users Review

From reader reviews:

Gilbert Albright:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite reserve and reading a reserve. Beside you can solve your trouble; you can add your knowledge by the publication entitled *Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics)*. Try to make the book *Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics)* as your friend. It means that it can to be your friend when you feel alone and beside those of course make you smarter than ever before. Yeah, it is very fortunated for yourself. The book makes you considerably more confidence because you can know every thing by the book. So , let me make new experience along with knowledge with this book.

Dana Barker:

In other case, little people like to read book *Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics)*. You can choose the best book if you love reading a book. Given that we know about how is important some sort of book *Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics)*. You can add expertise and of course you can around the world by just a book. Absolutely right, since from

book you can understand everything! From your country until eventually foreign or abroad you will find yourself known. About simple point until wonderful thing you could know that. In this era, we are able to open a book or perhaps searching by internet unit. It is called e-book. You need to use it when you feel weary to go to the library. Let's examine.

Charles Sizemore:

As people who live in the modest era should be up-date about what going on or details even knowledge to make these keep up with the era that is always change and move ahead. Some of you maybe will update themselves by reading books. It is a good choice for you personally but the problems coming to you actually is you don't know what type you should start with. This Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics) is our recommendation to help you keep up with the world. Why, because this book serves what you want and want in this era.

Dennis Carson:

Reading a e-book make you to get more knowledge as a result. You can take knowledge and information coming from a book. Book is written or printed or descriptive from each source which filled update of news. Within this modern era like right now, many ways to get information are available for you. From media social such as newspaper, magazines, science reserve, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or just in search of the Geospace Electromagnetic Waves and Radiation (Lecture Notes in Physics) when you necessary it?
