AHFS Drug Information 2014 By American Society of Health-System Pharmacists

Written and published by pharmacists and reviewed by over 500 experts, *AHFS Drug Information®* (AHFS DI) is the most comprehensive evidence-based source of drug information complete with therapeutic guidelines and off-label uses. The only print compendium designated by the US Congress, AHFS DI is also the only reference published by a professional and scientific society - ensuring it is the most authoritative and best-selling reference trusted by pharmacists for 55 years.

700,000 Adverse Drug Events occur every year. The majority of these are preventable.

AHFS DI is a must-have resource to have at your fingertips. Its detailed and comprehensive drug monographs deliver valuable information and therapeutic guidelines to even the most complex questions. Don't waste time searching other references when you know you will always find the answer you can trust to be accurate inside-every time.

Don't you owe it to yourself, your profession, and your patients?

Inside find peer-reviewed monographs that cover:

- Expanded and revised content, featuring critical new monograph updates every year
- Interactions, adverse reactions, cautions, and more
- Therapeutic recommendations supported by evidence from primary research
- Preparations, chemistry, and stability
- Pharmacology and pharmacokinetics
- Prescription, OTC, ophthalmic and dermatologic drugs
- Extensive, off-label uses and dosing options
- Vaccines and other immunizing agents

As always, there is a strong focus on safe and effective use of drugs. Hundreds of monographs have been updated for FDA's MedWatch alerts, risk evaluation mitigation strategies (REMS), and other critical safety information.

Be sure to stay up to date with the latest medwatch alerts, new drug monographs, and updates, with your online access to *AHFS Drug Information*. Get access with the username and password found within the preface of the print book.

[REVIEWER'S EXPERT OPINION]

Melissa M. Ranieri, BS, PharmD(Temple University School of Pharmacy)

Description

Published yearly with accompanying electronic updates, this is one of the most comprehensive collections of drug monographs available and is highly regarded for providing evidence-based, unbiased drug information.

Purpose

The mission is to publish objective and detailed data in order to provide safe and effective drug therapy. Supported by American Society of Health-System Pharmacists, this reference is well known for its independence from the pharmaceutical industry as well as for its accurate and thorough content. Drug monographs are prepared by professionals who review evidence-based information and include recommendations from experts in the field. This edition certainly maintains its high standard of excellence as a source of comparative, unbiased, and evidence-based drug information.

Audience

This resource is used routinely by physicians, pharmacists, nurses, and students. Although it is not designed as a point of care tool, it is convenient to have available when more detailed information is necessary. In particular, the dosing section is thorough, as is the material on off-label indications.

This is information that is not always readily available but is often needed to make clinical decisions. This publication would make an excellent addition to the library of a medical floor in a hospital, a pharmacy, or a physician's office as a source of well-referenced, objective, and thorough drug data.

Features

The book contains drug monographs for over 100,000 drug products. Drug information is categorized by therapeutic class, which allows for fast and convenient comparison for different agents in the same class. The information on dosing and label and off-label indications is comprehensive and particularly useful in clinical practice. Another unique feature is that it provides acute toxicity in overdose as well as more conventional toxicity for chronic use. The index is designed so that drug information can be referenced by brand name, generic name, or therapeutic class. Although this is published yearly in print form, a username and password is provided for online access to evolving information. This electronic content is continually updated so the user has access to the most current, evidence-based information. Although this reference is certainly thorough, there is some repetition in the introductory section for the therapeutic class, as well as within the

individual drug monographs.

However, the book is fairly well organized so that this is not really a problem and that information can still be easily found.

****Assessment****

Also known as the "big red book," this is a comprehensive, accurate, and well-referenced compendium of drug monographs. It succeeds at providing unbiased, well-researched, and evidence-based information. While it may not be the first place a healthcare provider references for drug information, it can certainly provide more detailed or hard to find information that can be clinically necessary.

Weighted Numerical Score: 97 - 5 Stars!

[REVIEWER'S EXPERT OPINION]

Laurence A. Goldberg

This book sets out to provide an evidence-based foundation for safe and effective drug therapy. With the publication of the current edition, the American Society of Health-System Pharmacists (ASHP) has continued to build on this foundation by providing a resource that focuses on the essential evidence-based information that will allow pharmacists, physicians, nurses and other healthcare providers to access quickly, in a straight-forward manner, the specific guidance needed to prescribe and monitor drug therapy safely and effectively.

This book is a collection of drug monographs on almost every single drug entity available in the US. Drug monographs are arranged by the AHFS Pharmacologic-Therapeutic Classification. Each easy-to-use monograph offers access to knowledge that is critical at the point of care. It contains a concise overview of the drug's uses (both labelled and off-label) and an easily navigated list of doses specific to each use, age group, route of administration and special population (eg, patients with hepatic or renal impairment). Important cautionary information follows a structured outline with numerous subdivisions of information to help the reader in locating specific contraindications, warnings, sensitivity alerts, safety in pregnancy and in breastfeeding women, drug interactions, etc.

Subscribers to the print version of this book will have free access to ASHP's companion website.

This text is soft backed with flimsy pages that are likely to become easily damaged with constant use. It is, however, an easy-to-use and valuable reference source. One important attribute is that it is the only remaining official drug compendium published in the US by a non-commercial professional and scientific society.

(Laurence A. Goldberg *The Pharmaceutical Journal* 2014-07-08)

Users Review

From reader reviews:

Kenneth Wallace:

People live in this new day time of lifestyle always try and and must have the spare time or they will get lot of stress from both daily life and work. So , whenever we ask do people have time, we will say absolutely without a doubt. People is human not really a huge robot. Then we ask again, what kind of activity do you have when the spare time coming to you of course your answer will unlimited right. Then do you try this one, reading guides. It can be your alternative within spending your spare time, the particular book you have read is usually AHFS Drug Information 2014.

John Davis:

Your reading sixth sense will not betray an individual, why because this AHFS Drug Information 2014 publication written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your own hunger then you still hesitation AHFS Drug Information 2014 as good book not simply by the cover but also from the content. This is one reserve that can break don't judge book by its cover, so do you still needing one more sixth sense to pick that!? Oh come on your examining sixth sense already told you so why you have to listening to another sixth sense.

Donald Benson:

Are you kind of stressful person, only have 10 or 15 minute in your time to upgrading your mind ability or thinking skill even analytical thinking? Then you are having problem with the book when compared with can satisfy your short period of time to read it because this time you only find e-book that need more time to be study. AHFS Drug Information 2014 can be your answer as it can be read by you actually who have those short time problems.

Juanita Geil:

As we know that book is essential thing to add our information for everything. By a publication we can know everything we want. A book is a group of written, printed, illustrated as well as blank sheet. Every year was exactly added. This guide AHFS Drug Information 2014 was filled about science. Spend your extra time to add your knowledge about your science competence. Some people has various feel when they reading the book. If you know how big benefit of a book, you can experience enjoy to read a publication. In the modern era like now, many ways to get book which you wanted.
