Business Skills for Engineers and Technologists (IIE Core Textbooks Series)

By Harry Cather, Richard Douglas Morris BSc MBA MIED I.Eng., Joe Wilkinson

The scope of Business Skills for Engineers and Technologists is wider than many traditional business texts, including hot topics such as e-commerce, business ethics and law, as well as fully up-to-date coverage of management issues and finance. The interactive style of the book is ideally suited for the study of business and management topics. Rather than focussing solely on management theory, the subjects are explored within real-world engineering contexts through numerous case studies and activities, which bring the content to life and create a highly accessible text for the student reader. The IIE Textbook Series from Butterworth-Heinemann

- Student-focused textbooks with numerous examples, activities, problems and knowledge-check questions
- Designed for a wide range of undergraduate courses
- Real-world engineering examples at the heart of each book
- Core texts suitable for students with no previous background studying engineering

"I am very proud to be able to introduce this series as the fruition of a joint publishing venture between Butterworth-Heinemann and the Institution of Incorporated Engineers. Mechanical Engineering Systems is one of the first three titles in a series of core texts designed to cover the essential modules of a broad cross-section of undergraduate programmes in engineering and technology. These books are designed with today's students firmly in mind, and real-world engineering contexts to the fore - students who are increasingly opting for the growing number of courses that provide the foundation for Incorporated Engineer registration." --Peter F Wason BSc(Eng) CEng FIEE FIIE FIMechE FIMgt. Secretary and Chief Executive, IIE This essential text is part of the IIE accredited textbook series from Newnes - textbooks to form the strong practical, business and academic foundations for the professional development of tomorrow's incorporated engineers.

- Content matched to requirements of IIE and other BSc Engineering and Technology courses
- An essential textbook, providing all the information for student engineers preparing to work in a business environment, including hot topics such as e-commerce and business ethics
- Student-centred text featuring worked examples, case studies, assignments and knowledge-check questions throughout

Editorial Review

Review

"The book is well illustrated with diagrams. Numerical techniques are demonstrated with well-chosen examples, presented in sufficient detail to be followed with ease. Lecturers could easily base a course on this book. It is well suited to the second and possibly third years of a degree program. Though particularly useful to the prospective incorporated engineer, it could well be used by others." --**Times Higher Educational Supplement, 2002**

"The business text introduces key business concepts and tools (including eCommerce) in a manner which will allow the text to be a key component of (e.g.) a Technology Management course or as a support for the business and management sections of other engineering and technology subjects." --**Alistair Duffy, Series Editor**

"The authors take a uniquely student-centered approach to the subject, with easily accessible material introduced through case studies, assignments and knowledge-check questions. The interactive style of the book is ideally suited for the study of business and management topics, bringing the subjects to life with activities and case studies rather than devoting hundreds of pages to management theory." --**Electronic Servicing and Technology**

From the Publisher

This essential text is part of the IIE accredited textbook series from Newnes - textbooks to form the strong practical, business and academic foundations for the professional development of tomorrow's incorporated engineers. Forthcoming lecturer support materials and the IIE textbook series website will provide additional material for handouts and assessment, plus the latest web links to support, and update case studies in the book.

About the Author

Harry Cather started as an apprentice Mechanical Engineer. His initial studies were part-time and concluded in becoming a C.Eng through the Institute of Production Engineers (now amalgamated with the IEE). He continued gaining knowledge, partially through courses, experience and other learning processes leading to an MBA and MSc. Being a "good" engineer, led him to study management in addition to engineering and he is a member of CMI and an associate member of IBA. Before joining the University of Brighton, his career was in support functions from Industrial/Production Engineering through Project Management to Workshop Management. In addition to engineering, he has worked in a wide variety of industries from mining to food, including three foreign postings. He is involved in TCS schemes and has carried out assignments for BESO, a volunteer organisation that assists in transferring technology to developing countries. Harry has recently set up as Industrial Consultant and welcomes any queries at harry@consultca.co.uk.

Users Review

From reader reviews:

Daniel Ellis:

This book untitled Business Skills for Engineers and Technologists (IIE Core Textbooks Series) to be one of several books that best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit upon it. You will easily to buy this book in the book retail outlet or you can order it by means of online. The publisher of this book sells the e-book too. It makes you easier to read this book, since you can read this book in your Smart phone. So there is no reason to you to past this guide from your list.

Delores Villarreal:

Typically the book Business Skills for Engineers and Technologists (IIE Core Textbooks Series) will bring you to definitely the new experience of reading a new book. The author style to describe the idea is very unique. When you try to find new book to learn, this book very appropriate to you. The book Business Skills for Engineers and Technologists (IIE Core Textbooks Series) is much recommended to you to learn. You can also get the e-book in the official web site, so you can quickly to read the book.

Virgil Santamaria:

Within this era which is the greater man or who has ability to do something more are more important than other. Do you want to become one of it? It is just simple solution to have that. What you should do is just spending your time very little but quite enough to have a look at some books. One of the books in the top listing in your reading list is usually Business Skills for Engineers and Technologists (IIE Core Textbooks Series). This book and that is qualified as The Hungry Inclines can get you closer in becoming precious person. By looking right up and review this guide you can get many advantages.

Marvin Ober:

E-book is one of source of information. We can add our understanding from it. Not only for students and also native or citizen want book to know the upgrade information of year for you to year. As we know those books have many advantages. Beside most of us add our knowledge, may also bring us to around the world. By the book Business Skills for Engineers and Technologists (IIE Core Textbooks Series) we can consider more advantage. Don't someone to be creative people? To be creative person must love to read a book. Simply choose the best book that suitable with your aim. Don't be doubt to change your life by this book Business Skills for Engineers and Technologists (IIE Core Textbooks Series). You can more desirable than now.
