High Noon in the Cold War: Kennedy, Khrushchev, and the Cuban Missile Crisis By Max Frankel

One of the giants of American journalism now re-creates an unforgettable time—in which the whole world feared extinction. *High Noon in the Cold War* captures the Cuban Missile Crisis in a new light, from inside the hearts and minds of the famous men who provoked and, in the nick of time, resolved the confrontation.

Using his personal memories of covering the conflict, and gathering evidence from recent records and new scholarship and testimony, Max Frankel corrects widely held misconceptions about the game of “nuclear chicken” played by John Kennedy and Nikita Khrushchev in October 1962, when Soviet missiles were secretly planted in Cuba and aimed at the United States.

High Noon in the Cold War portrays an embattled young American president not jaunty and callow as widely believed, but increasingly calm and statesmanlike and a Russian ruler who was not only a “wily old peasant” but an insecure belligerent desperate to achieve credibility. Here, too, are forgotten heroes like John McCone, the conservative Republican CIA head whose intuition made him a crucial figure in White House debates.

In detailing the disastrous miscalculations of the two superpowers (the U.S. thought the Soviets would never deploy missiles to Cuba; the Soviets thought the U.S. would have to acquiesce) and how Kennedy and Khrushchev beat back hotheads in their own councils, this fascinating book re-creates the *whole* story of the scariest encounter of the Cold War, as told by a master reporter.

Editorial Review

From Publishers Weekly

"It all began with a Russian ploy worthy of the horse at Troy." So begins Frankel's account of the most dangerous moment of the Cold War. In October 1962, two men, Khrushchev and John F. Kennedy, stood locked in psychological combat, a hairbreadth from Armageddon. A former executive editor of the *New York Times* and Pulitzer winner who covered Khrushchev's Moscow, Kennedy's Washington and Castro's Havana, Frankel blends his own notes with the most recent scholarship on the crisis. The result is a great story, told from different vantage points and filled with drama. While he concludes that the U.S. and the U.S.S.R. were never really on the brink of war, Frankel constantly reminds us of how high the stakes were; the balance of geopolitical power with Cuba, Berlin, Turkey and the solidarity of the NATO alliance were all at risk. Kennedy is presented as the unquestionable hero in this confrontation, a man full of imagination, capable of great cunning and equally adroit at outmaneuvering both his Russian and Republican foes. As his adviser McGeorge Bundy once observed, "[F]orests have been felled to print the reflections and conclusions of participants, observers and scholars" of the crisis. Though breaking no new ground, Frankel offers sobering lessons in leadership for the war on terrorism.

Review

An engaging account of those six days in October when it seemed as if the world were coming to an end. Veteran New York Times journalist and editor Frankel (*The Times of My Life*, 1999) covered Khrushchev in Moscow and Kennedy in Washington, and he brings a balanced appreciation for the motivations driving and obstacles facing both leaders as they confronted each other in the fall of 1962. Many things were at issue, Frankel writes, but one factor was that the Soviet premier worked from a sense of insecurity: "It was to offset a debilitating weakness, not to imperil America, that Khrushchev careered into the crisis." At the same time, he suggests that the Soviet decision to place intermediate-range missiles in the satellite state of Cuba was not without provocation: Khrushchev and many of his lieutenants were deeply resentful of a recent US decision to locate Jupiter missiles in neighboring Turkey, aimed directly at the Soviet Union. Interestingly, writes Frankel, the Soviet ploy—which would have required the presence of more than 40,000 technicians, soldiers, and support staff—barely involved the Castro regime, which was largely kept out of the loop even as Fidel clamored to advertise the deployment of missiles as a nose-thumbing to the hated Yanquis. Though he growled convincingly, Khrushchev, Frankel believes, was "decidedly less menacing than the man we had all pictured from afar"; he was more concerned with making symbolic gestures and attained face-saving concessions than with actually touching off the next holocaust. Similarly, Frankel writes, Kennedy had no desire for war, and by sharp contrast with the current administration—he took pains to consider how European and Latin American allies would view his actions. They rattled sabers with not much intention of using them, and in the end, Frankel holds, both leaders "found it useful to exaggerate the danger they had surmounted" for political reasons, though it did neither any good. A crisis, then, but less dangerous than we thought. A useful corrective to the historical record by a trustworthy narrator. (Kirkus Reviews)
