Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics) By K.R. Pearson, B.R. Parmenter, A.A. Powell, P.J. Wilcoxen, P.B. Dixon

"General-equilibrium" refers to an analytical approach which looks at the economy as a complete system of inter-dependent components (industries, households, investors, governments, importers and exporters). "Applied" means that the primary interest is in systems that can be used to provide quantitative analysis of economic policy problems in particular countries. Reflecting the authors' belief in the models as vehicles for practical policy analysis, a considerable amount of material on data and solution techniques as well as on theoretical structures has been included. The sequence of chapters follows what is seen as the historical development of the subject.

The book is directed at graduate students and professional economists who may have an interest in constructing or applying general equilibrium models. The exercises and readings in the book provide a comprehensive introduction to applied general equilibrium modeling. To enable the reader to acquire hands-on experience with computer implementations of the models which are described in the book, a companion set of diskettes is available.

Editorial Review

Review

The book is well-written and requires only familiarity with equation manipulations and constrained optimization. It is an ideal text for an applied general equilibrium course, as well as a useful reference for students interested in using computational general equilibrium models as a research tool.

Zentralblatt für Mathematik

Users Review

From reader reviews:

Louise Wax:

What do you think of book? It is just for students since they are still students or it for all people in the world, what best subject for that? Merely you can be answered for that concern above. Every person has various personality and hobby per other. Don't to be pushed someone or something that they don't want do that. You must know how great and important the book Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics). All type of book would you see on many options. You can look for the internet sources or other social media.

Leslie Hackett:

Book is to be different per grade. Book for children until adult are different content. To be sure that book is very important usually. The book Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics) had been making you to know about other information and of course you can take more information. It doesn't matter what advantages for you. The guide Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics) is not only giving you a lot more new information but also to be your friend when you sense bored. You can spend your current spend time to read your publication. Try to make relationship together with the book Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics). You never sense lose out for everything should you read some books.

Catherine Nelson:

Now a day folks who Living in the era everywhere everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each info they get. How a lot more to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Examining a book can help men and women out of this uncertainty Information mainly this Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics) book as this book offers you rich info and knowledge. Of course the data in this book hundred percent guarantees there is no doubt in it you probably know this.

Robert Lewis:

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a expertise or any news even a concern. What people must be consider any time those information which is in the former life are difficult to be find than now is taking seriously which one is appropriate to believe or which one the resource are convinced. If you get the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take Notes and Problems in Applied General Equilibrium Economics, Volume 32 (Advanced Textbooks in Economics) as your daily resource information.
