Algebra (Graduate Texts in Mathematics) (v. 73) By Thomas W. Hungerford

Finally a self-contained, one volume, graduate-level algebra text that is readable by the average graduate student and flexible enough to accommodate a wide variety of instructors and course contents. The guiding principle throughout is that the material should be presented as general as possible, consistent with good pedagogy. Therefore it stresses clarity rather than brevity and contains an extraordinarily large number of illustrative exercises.

Editorial Review

Review

From the book reviews:

“This is a text for a first-year graduate course in abstract algebra. It covers all the standard topics and has more than enough material for a year course.” (Allen Stenger, MAA Reviews, September, 2014)

Thomas W. Hungerford

Algebra

"An excellent text from which to teach the beginning graduate survey course in algebra and I would recommend it to anyone considering a text for such a course." LINEAR AND MULTILINEAR ALGEBRA

Users Review

From reader reviews:

William Leighty:

Book is actually written, printed, or descriptive for everything. You can learn everything you want by a publication. Book has a different type. To be sure that book is important issue to bring us around the world. Adjacent to that you can your reading talent was fluently. A e-book Algebra (Graduate Texts in Mathematics) (v. 73) will make you to end up being smarter. You can feel far more confidence if you can know about everything. But some of you think that will open or reading a new book make you bored. It is not make you fun. Why they can be thought like that? Have you looking for best book or ideal book with you?

Stacee Stern:

Book is to be different for every grade. Book for children till adult are different content. As you may know that book is very important for all of us. The book Algebra (Graduate Texts in Mathematics) (v. 73) has been making you to know about other understanding and of course you can take more information. It doesn't matter what advantages for you. The book Algebra (Graduate Texts in Mathematics) (v. 73) is not only giving you more new information but also to become your friend when you feel bored. You can spend your current spend time to read your e-book. Try to make relationship with all the book Algebra (Graduate Texts in Mathematics) (v. 73). You never really feel lose out for everything in the event you read some books.

Norman Fuentes:

The publication untitled Algebra (Graduate Texts in Mathematics) (v. 73) is the reserve that recommended to

you you just read. You can see the quality of the e-book content that will be shown to a person. The language that publisher use to explained their ideas are easily to understand. The article author was did a lot of study when write the book, therefore the information that they share for your requirements is absolutely accurate. You also could get the e-book of Algebra (Graduate Texts in Mathematics) (v. 73) from the publisher to make you more enjoy free time.

Virgie Haynes:

This Algebra (Graduate Texts in Mathematics) (v. 73) is great reserve for you because the content which is full of information for you who else always deal with world and possess to make decision every minute. This specific book reveal it info accurately using great arrange word or we can claim no rambling sentences inside. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only will give you straight forward sentences but hard core information with lovely delivering sentences. Having Algebra (Graduate Texts in Mathematics) (v. 73) in your hand like finding the world in your arm, info in it is not ridiculous a single. We can say that no reserve that offer you world within ten or fifteen second right but this book already do that. So , this is good reading book. Heya Mr. and Mrs. active do you still doubt that will?
