

Expert Spring MVC and Web Flow (Expert's Voice in Java)

By Colin Yates, Seth Ladd, Steven Devijver, Darren Davison

Expert Spring MVC and Web Flow (Expert's Voice in Java) By Colin Yates, Seth Ladd, Steven Devijver, Darren Davison

Expert Spring MVC and Web Flow provides in-depth coverage of Spring MVC and Spring Web Flow, two highly customizable and powerful web frameworks brought to you by the developers and community of the Spring Framework. Spring MVC is a modern web application framework built upon the Spring Framework, and Spring Web Flow is a new project that complements Spring MVC for building reusable web controller modules that encapsulate rich page navigation rules. Along with detailed analysis of the code and functionality, plus the first-published coverage of Spring Web Flow, this book includes numerous tips and tricks to help you get the most out of Spring MVC, Spring Web Flow, and web development in general.

Spring MVC and Spring Web Flow are engineered with an important consideration for design patterns and expert object oriented programming techniques. This book explains not only the design decisions of the frameworks, but also how you can apply similar designs and techniques to your own code.

This book takes great care in covering every inch of Spring MVC and Spring Web Flow to give you the complete picture. Along with all the best known features of these frameworks, you'll discover some new hidden treasures. You'll also learn how to correctly and safely extend the frameworks to create customized solutions.

From beginner to expert, this book is for anyone who wishes to write robust, modern, and useful web applications with the Spring Framework.

Table of Contents

1. Introduction
2. Spring Fundamentals
3. Spring MVC Application Architecture
4. Jump into Spring MVC
5. The Processing Pipeline
6. The Controller Menagerie

7. The View Layer
8. Supported View Types
9. Validation
10. Testing Spring MVC Applications
11. Introduction to Spring Web Flow
12. Advanced Spring Web Flow

Editorial Review

About the Author

Colin Yates is a J2EE principal architect who specializes in web-based development. He has been a freelance consultant for the past three years and has worked in a number of environments, both structured and chaotic. Since graduating with a software engineering degree in 1997, he has held a number of positions, including development lead, principal systems engineer, mentor, and professional trainer. His principal skill set includes mentoring others, architecting complex problems into manageable solutions, and optimizing development processes.

Colin was first introduced to the Spring Framework in January 2003 by his mentors, Peter Den Haan and David Hewitt, and he has never looked back. After a couple of years using the Spring and Hibernate technology stack to good effect, in May 2005 he became one of the early adopters of Spring Web Flow, finally finding the missing item in the web development toolbox. A self-confessed addict of the green bar that comes from following test-driven development and XP, Colin regularly frustrates new team members by introducing a continuous build environment.

When not hanging around the Spring support forums (<http://forum.springframework.org>), Colin can be found out walking with his wife and two dogs, practicing martial arts, attending his local church, or preparing for the arrival of his first child.

Seth Ladd is a software engineer and professional Spring Framework trainer and mentor specializing in object-oriented and testable web applications. He started his own company building websites at age 17, but now enjoys having a real job. Currently working for Camber Corporation, Seth has built and deployed systems for NEC, Rochester Institute of Technology, Brivo Systems, and National Information Consortium. He has architected and developed enterprise applications in Java and C for both the server and remotely connected embedded devices. He enjoys speaking and teaching, and is a frequent presenter at local Java user groups and at corporate developer conferences. Seth is very thankful for living and working in Kailua, Hawaii, with his wife.

Steven Devijver is an experienced Java developer who started developing J2EE applications in 2000. In 2003 he discovered the Spring Framework, and since then he has been one of its most enthusiastic users. Steven is a senior consultant at Interface21, teaching hundreds of students every year about the Spring Framework.

Darren Davison is a principal consultant for UPCO, specializing in J2EE and open source Java technologies. He has been involved with Spring since the summer of 2003, well before its 1.0 release, and he used the framework to underpin a global intranet site for an investment bank. Darren has previously worked for multinational manufacturing and engineering companies on e-business, infrastructure, and many web-based projects. Away from work, Darren enjoys the never-ending journey of discovery that is GNU/Linux. When not in front of a computer screen, he likes reading and any form of live entertainment.

Users Review

From reader reviews:

Adele Rowan:

In other case, little persons like to read book Expert Spring MVC and Web Flow (Expert's Voice in Java). You can choose the best book if you want reading a book. Given that we know about how is important some sort of book Expert Spring MVC and Web Flow (Expert's Voice in Java). You can add knowledge and of course you can around the world by just a book. Absolutely right, since from book you can realize everything! From your country right up until foreign or abroad you will end up known. About simple matter until wonderful thing you are able to know that. In this era, we could open a book or perhaps searching by internet product. It is called e-book. You should use it when you feel bored to go to the library. Let's examine.

Martha Furman:

Do you one of people who can't read satisfying if the sentence chained inside the straightway, hold on guys this particular aren't like that. This Expert Spring MVC and Web Flow (Expert's Voice in Java) book is readable by means of you who hate those straight word style. You will find the data here are arrange for enjoyable reading through experience without leaving perhaps decrease the knowledge that want to offer to you. The writer involving Expert Spring MVC and Web Flow (Expert's Voice in Java) content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the articles but it just different by means of it. So , do you still thinking Expert Spring MVC and Web Flow (Expert's Voice in Java) is not loveable to be your top list reading book?

Cedric Baker:

This Expert Spring MVC and Web Flow (Expert's Voice in Java) is completely new way for you who has interest to look for some information given it relief your hunger details. Getting deeper you on it getting knowledge more you know or perhaps you who still having little digest in reading this Expert Spring MVC and Web Flow (Expert's Voice in Java) can be the light food to suit your needs because the information inside this particular book is easy to get by means of anyone. These books develop itself in the form that is certainly reachable by anyone, sure I mean in the e-book web form. People who think that in e-book form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a publication especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book variety for your better life and also knowledge.

Peter Zimmerman:

As a student exactly feel bored for you to reading. If their teacher questioned them to go to the library or make summary for some publication, they are complained. Just small students that has reading's soul or real their pastime. They just do what the professor want, like asked to go to the library. They go to there but nothing reading seriously. Any students feel that examining is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important for you personally. As we

know that on this era, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Expert Spring MVC and Web Flow (Expert's Voice in Java) can make you experience more interested to read.
