**QBase Radiology: Volume 1, MCQs for the FRCR (v. 1)** By R. R. Misra, Dr M. C. Uthappa, P. S. Richards, D. Evans, O. Chan

QBase Radiology 1 and 2 together represent a completely comprehensive resource for all postgraduate and undergraduate trainees in radiology. In combination, the books include 900 multiple choice questions (480 on Volume 1 and 420 on Volume 2) and the free CD-ROMs that accompany both books also contain all 900 MCQs and over 100 high quality radiological images. The powerful QBase examination analysis software allows the reader to attempt the same exams as printed in the book, but on screen, realistically replicating the examination situation. The user can also 'custom-build' their own exams based on their own choice of subjects and number of questions, sit an exam that is automatically set by the program using all of the questions on the CD, or they can sit a 'shuffled' version of an exam, whereby the question parts (A-E) are reorganised automatically to avoid pattern recognition. The software also allows the user to set their own 'confidence level' when taking an exam and it will automatically mark, analyse and store completed exams for future review and re-sitting, allowing the package to be used as a fully interactive self-learning tool.
