Renewable Energy Made Easy: Free Energy from Solar, Wind, Hydropower, and Other Alternative Energy Sources By David Craddock

Studies have shown that the average North American family will spend more than a quarter of a million dollars on energy in a lifetime. What many other countries, including Germany, Spain, France, Denmark, China, Brazil, and even Iceland, have realized is that there is a better way to power our homes, businesses, and cars by using renewable energy sources.

Recently, the United States has begun to understand the importance of reducing its reliance on coal, natural gas, nuclear power, and hydropower plants, which comprise the majority of the nation's electricity, due to increasing oil prices. Some sections of the country, including California, are turning to renewable energy sources. In fact, 12 percent of California's electricity is produced by renewable resources. The potential for the use of renewables is very large and understanding their use and their impact is key.

Renewable Energy Made Easy will provide you with everything you need to know about these alternative energy sources. You will learn about solar power, wind power, water power, biofuels, geothermal energy, ethanol, wave farms, photovoltaic power plants, and hydrogen fuels. You will also become well-versed on the availability, aesthetics, environmental and social considerations, and longevity issues of these so-called soft energy technologies. In addition, you will learn about the current costs and the projected costs in the future, ENERGY STAR® regulations, the newest research and innovations, and the high development potential of renewable energy.

This book will serve as a guide to creating more efficient buildings and an invaluable resource for how to change our preconceived notions about power. This book has taken the complexity and scientific terms out of this topic, making it jargon-free and easy to understand. Ultimately, you will learn how our country can improve energy efficiency, reduce oil dependence, improve energy security, and reduce the health and environmental impact of our current energy system.

Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Founded over twenty years ago in the company president's garage, Atlantic Publishing has grown to become a renowned resource for non-fiction books. Editorial Review

Review

"Renewable Energy Made Easy is a great read for people of all knowledge levels when it comes to going green. David Craddock does an amazing job at laying out the history, facts, pros, and cons of a variety of renewable energy sources, and then gives the reader a step-by-step DIY guide to all sorts of projects you can use to make your house, office, and life help the environment. We at TerraTone Music are and will continue to promote this book at all our events!" Shanti Schweizer --Shanti Schweizer

For those of us who want to actively engage in the global effort to stem climate change, Renewable Energy Made Easy provides a good introduction to various forms of non-fossil fuel energy. It enables the reader to gain historical perspective of various forms as well as the current pros and cons of each type. The book also provides a variety of small renewable energy projects you can make at home as well as whole house projects. Recent research continues to confirm the time for action is now; Renewable Energy Made Easy offers an important starting point for those beginning to mobilize. Sarah K.
