Emerging Cognitive Neuroscience and Related Technologies By National Research Council

Emerging Cognitive Neuroscience and Related Technologies, from the National Research Council, identifies and explores several specific research areas that have implications for U.S. national security, and should therefore be monitored consistently by the intelligence community. These areas include:

1. neurophysiological advances in detecting and measuring indicators of psychological states and intentions of individuals
2. the development of drugs or technologies that can alter human physical or cognitive abilities
3. advances in real-time brain imaging
4. breakthroughs in high-performance computing and neuronal modeling that could allow researchers to develop systems which mimic functions of the human brain, particularly the ability to organize disparate forms of data.

As these fields continue to grow, it will be imperative that the intelligence community be able to identify scientific advances relevant to national security when they occur. To do so will require adequate funding, intelligence analysts with advanced training in science and technology, and increased collaboration with the scientific community, particularly academia.

A key tool for the intelligence community, this book will also be a useful resource for the health industry, the military, and others with a vested interest in technologies such as brain imaging and cognitive or physical enhancers.

Editorial Review

About the Author

Committee on Military and Intelligence Methodology for Emergent Neuropysiological and Cognitive/Neural Research in the Next Two Decades, National Research Council

Users Review

From reader reviews:

James Smith:

Book will be written, printed, or descriptive for everything. You can recognize everything you want by a e-book. Book has a different type. To be sure that book is important issue to bring us around the world. Close to that you can your reading skill was fluently. A reserve Emerging Cognitive Neuroscience and Related Technologies will make you to possibly be smarter. You can feel more confidence if you can know about almost everything. But some of you think that will open or reading any book make you bored. It is far from make you fun. Why they may be thought like that? Have you searching for best book or acceptable book with you?

Sandra Castillo:

Reading a publication tends to be new life style in this particular era globalization. With reading through you can get a lot of information that could give you benefit in your life. With book everyone in this world can share their idea. Books can also inspire a lot of people. A great deal of author can inspire their particular reader with their story or maybe their experience. Not only situation that share in the books. But also they write about the data about something that you need example. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors these days always try to improve their expertise in writing, they also doing some analysis before they write on their book. One of them is this Emerging Cognitive Neuroscience and Related Technologies.

Richard Brassell:

Reading a book for being new life style in this yr; every people loves to study a book. When you learn a book you can get a large amount of benefit. When you read books, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. In order to get information about your analysis, you can read education books, but if you want to entertain yourself read a fiction books, this sort of us novel, comics, along with soon. The Emerging Cognitive Neuroscience and Related Technologies will give you a new experience in reading through a book.

Corey Watts:

Do you like reading a e-book? Confuse to looking for your best book? Or your book ended up being rare? Why so many query for the book? But just about any people feel that they enjoy with regard to reading. Some people likes looking at, not only science book but novel and Emerging Cognitive Neuroscience and Related Technologies or perhaps others sources were given information for you. After you know how the great a book, you feel would like to read more and more. Science e-book was created for teacher or perhaps students especially. Those publications are helping them to include their knowledge. In some other case, beside science guide, any other book likes Emerging Cognitive Neuroscience and Related Technologies to make your spare time a lot more colorful. Many types of book like this one.
