### In 100 Years: Leading Economists Predict the Future (MIT Press) From Brand: The MIT Press

This pithy and engaging volume shows that economists may be better equipped to predict the future than science fiction writers. Economists' ideas, based on both theory and practice, reflect their knowledge of the laws of human interactions as well as years of experimentation and reflection. Although perhaps not as screenplay-ready as a work of fiction, these economists' predictions are ready for their close-ups. In this book, ten prominent economists -- including Nobel laureates and several likely laureates -- offer their ideas about the world of the twenty-second century.

In scenarios that range from the optimistic to the guardedly gloomy, these thinkers consider such topics as the transformation of work and wages, the continuing increase in inequality, the economic rise of China and India, the endlessly repeating cycle of crisis and (projected) recovery, the benefits of technology, the economic consequences of political extremism, and the long-range effects of climate change. For example, 2013 Nobelist Robert Shiller provides an innovative view of future risk management methods using information technology; and Martin Weitzman raises the intriguing but alarming possibility of using geoengineering techniques to mitigate the inevitable effects of climate change.

**Contributors** Daron Acemoglu, Angus Deaton, Avinash K. Dixit, Edward L. Glaeser, Andreu Mas-Colell, John E. Roemer, Alvin E. Roth, Robert J. Shiller, Robert M. Solow, Martin L. Weitzman
